Each bowl holds 5ltrs of finished product, approximately 65 portions /30p

Soft ice-cream, Frozen Yogurt, Chilled coffee cream, Sherbet or Slush - **GT Touch** provides maximum flexibility, delivering the most appropriate product according to the time of the day, to the customer type and to the season. The standard **I-TANK™ Technology** prevents ice accumulation on the outer walls of the bowl.

GT TOUCH is the multitasking model of the GT Collection range, the soft ice-cream delivery equipment line designed by SPM Drink Systems.

Thanks to the software developed by the **SPM Drink Systems**, the machine can deliver up to 5 different products, according to the selected program and to the base product in the bowl.

Ideal for Bars, Restaurants, Hotels, Cafeterias and Catering Companies for the production of delicious desserts and chilled specialties, **GT TOUCH** can also be used in specialised ice-cream shops to deliver products specifically conceived for particular customer categories, like coeliac or people who are lactose intolerant. Producing ice-cream with this equipment prevents any cross contamination, as the bowls don't come into contact with other ingredients.

Operators can choose between Soft Ice-Cream, Frozen Yogurt, Chilled Coffee Cream, Sherbet or Slush. The selection menu is in English, but other languages can be programmed as well.

GT TOUCH is suitable for merchandising initiatives; for targeted projects (large-volume orders) we can customise the display, the menu setting language, the deliverable products and the graphics.
